

Release note for Server Imaging Utility October 2017

Notes

A new license file format is used for this release. Please use Member's Only Downloader v2.4.0 or later to create these new license files as MOD v2.3.0 or earlier's files will not be compatible.

Included BlackTrax Release:

v2.2.3

Dongle Date Requirement:

July 26th 2016

Major changes:

- Device Manager now replaces CSM
- Added native support for 10.x Art-Net networks
- Several small improvements and bug fixes for Server Manager
- Unified design style of all server tools

Known issues:

- Motive may freeze the first time it's launched

Features and Fixes:

Bug

- *Fixed: Reverted RAID drivers to the previous release as the new release may in rare cases cause the server to blue screen after a fresh image*
- *Fixed: CamStudio can now run on the servers*
- *Fixed: Imaging Utility now checks for fixed hard drives and reports if none are found*
- *Fixed: Imaging Utility's timestamped backups were recording the wrong date*
- *Fixed: .tak files were being backed up via the Server Manager, generating very long transfer times in some cases*
- *Fixed: If a .tak file was on the backup server, it was not being archived*
- *Fixed: Server Manager was sometimes generating two archive folders for the same backup when doing backups*
- *Fixed: The timestamp the Server Manager was generating for backups was recording the wrong time*
- *Fixed: Mapping the network folder in Server Manager sometimes resulted in the application hanging*
- *Fixed: Server Manager would hang if BTLINK connection was lost*
- *Fixed: NIC Description was editable in Server Manager*

New Feature

- *CSM is no longer included with the servers and is now replaced with Device Manager 2.1.3 BETA*
- *Added native support for 10.x ArtNet networks with the addition of 10.0.1.9 and 10.0.1.19 IP addresses to the RTTrPL NIC*
- *Server Manager can auto detect when the Windows Firewall is enabled and prompt for the user to disable it*

Improvement

- *Added the BlackTrax folder to the Favorites bar by default*
- *Now using Chrome 64-Bit*
- *Monitor is now included in the Startup folder for the Backup profile*
- *Main GUI and Monitor configuration files are now included in the Imaging Utility backup*
- *Imaging Utility now refreshes automatically when the USB is removed or inserted*
- *Support for new license format used in the Member's Only Downloader 2.4.0*
 - **Note:** *Licenses generated with MOD 2.3.0 or earlier will not be compatible with this release*
- *BTX Dongle is now displayed in Server Manager's About page*
- *Added a confirmation when mapping the network drive is complete in Server Manager*
- *Added a shortcut to the Windows' NIC Adapters from the Network tab of Server Manager*
- *Added a refresh button to the Backup and Network tabs of Server Manager to refresh NIC status*
- *Removed adding individual NIC profiles to NICs in Server Manager*

Design Review

- *Windows Explorer is now collapsed by default*
- *Imaging Utility's installer has been cleaned up slightly*
 - *Matched new design style of Member's Only Download and Server Manager*
 - *Single button for existing or installing*
 - *Refresh button removed as refreshing is automatic*
 - *Acknowledgement checkbox now appears disabled when it is disabled*
 - *Removed progress bar and spinning X*
 - *Added moving arrows on each step*
 - *Renamed 'Copying Image' to 'Expanding Image'*
 - *Startup animation has been removed and replaced with a progress bar*
 - *BlackTrax logo has been replaced with the BlackTrax text during first boot*
- *Network tab of Server Manager now sorts NICs in order to match the physical server's layout*
- *Displays what the new server name will be when changing Profiles in Server Manager*
- *Clarified server renaming on the Home tab of Server Manager*
- *RTTrP logo was added to the About page of Server Manager*
