Motive: 2.0.1.1.38436

Server Version Requirement:

July 2016

Compatible with RTTrP Versions:

6

1.8.3

1.8.7

Features and Fixes:

Bug

- *Fixed: GUI would crash if you changed the offsets of multiple fixtures using Several Chapters*
- *Fixed: GUI would crash if you redo a fixture offset change*
- *Fixed: Fixtures would not turn back on if the fixture faded out due to Auto Douse, but then changed to a Chapter without auto douse*
- *Fixed: 16-bit fixtures would not fade back up cleanly when using Zones*
- *Fixed: The GUI would consistently use more CPU the longer it was left running, and animations would start to become slow*
- *Fixed: Several Chapters was selecting the wrong fixture when searching*
- *Fixed: Shutting down BTEngine would result in a pop-up message about Stage being open (this is for future features... shhh)*

Improvement

- *The changed IP message will now only show once instead of every five minutes*
